

NOTES

Polar Bear Score Card: A Standardized Fatness Index

Illustrations by Doug Lindstrand

1

SKINNY

Skinny emaciated appearance, vertebrae, ribs, and hip bones externally visible without palpation, no fat palpable between skin and muscle over the dorsal body, hips, or lower rump.

2

THIN

Thin, vertebrae and hip bones (but not ribs) partially visible, easily palpable under the skin, little/ no fat between skin and muscle over the back, small amounts of fat detectable on lower rump.

3

AVERAGE

Average healthy appearance, vertebrae / hip bones not visible, upper 1/3 to 1/2 of the spinal column can be felt under the skin, detectable layer of fat between skin and muscle over rear half of body, thickening slightly but detectably over lower rump.

4

FAT

Fat, vertebrae / hip bones not visible, palpation reveals fat deposited over upper vertebrae, hip bones difficult to feel through fat, fat thick over rump, a hand rubbed above the rump will initiate ripples in the skin over the fat layer.

5

VERY FAT

Obese, vertebrae /hip bones undetectable by palpation, thick layer of fat is apparent between skin and muscle 2/3 of the way up the back & over rump, a hand rubbed on lower back above rump sets off waves of rolling fat, possibly jiggling.

Condition: This is a subjective determination of bear's body condition based on assessment of body fat.
