Forskrift om nasjonalparkene Sør-Spitsbergen, Forlandet og Nordvest-Spitsbergen, om naturreservatene Nordaust-Svalbard og Sørøst-Svalbard, og om naturreservatene for fugl på Svalbard

Chapter 3 Nature Reserves for birds

0

The headline changed by regulation 20 des 2019 no. 2019. 1912 (in effect 1 Jan 2020).

Section 29. Bird reserves

Svalbard has the following nature reserves for birds:

- a) South Cape Nature Reserve for Birds encompassing Sørkappøya and the islands and reefs south-east from Øylandet.
- b) Dunøyane Nature Reserve for birds encompassing all islands and reefs west of Dunøysundet.
- c) The Isøyane Nature Reserve for Birds encompassing northern Isøya and Isøykalven.
- d) Olsholmen Nature Reserve for Birds encompassing Olsholmen.
- e) Kapp Linné Nature Reserve for Birds that includes the area west of the line from Randvika to the southeastern end of Fyrstesjøen except Isfjord Radio's station area.
- f) Boheman Nature Reserve for Birds encompassing the small islands south of Bohemanflya.
- g) Gåsøyane Nature Reserve for Birds that includes Gåsøyane.
- h) Plankeholmane Nature Reserve for Birds that includes Plankeholmane.
- i) Forlandsøyane Nature Reserve for Birds encompassing Forlandsøyane.
- j) Hermansenøya Nature Reserve for Birds that includes Hermansenøya.
- k) Kongsfjorden Nature Reserve for Birds that includes Mietheholmen, Prins Heinrichøya, Lovenøyane and Eskjeret.
- l) Blomstrandhamna Nature Reserve for Birds that includes the outer and inner Breøyane.
- m) Guissezholmen Nature Reserve for Birds that includes the islets at Cape

Guissez.

n) Skorpa Nature Reserve for Birds encompassing the islets at Harpunodden

o) Moseøya Nature Reserve for Birds encompassing Moseøya

p) Liefdefjorden Nature Reserve for Birds that includes Andøyane, Stasjonsøyane, Måkeøyane and Lernerøyane with surrounding islets.

The nature reserves for birds, as shown on maps in Annex 1 (below), include the sea area out to 300 meters from land or reefs at the lowest water level.

Changed by Regulation 20 Des 2019 No. 1912 (in effect 1 Jan 2020).

Section 30. Purpose

The purpose of the peace is to ensure important breeding and living areas for birds, especially eiders and geese.

Section 31. Prohibition of all traffic

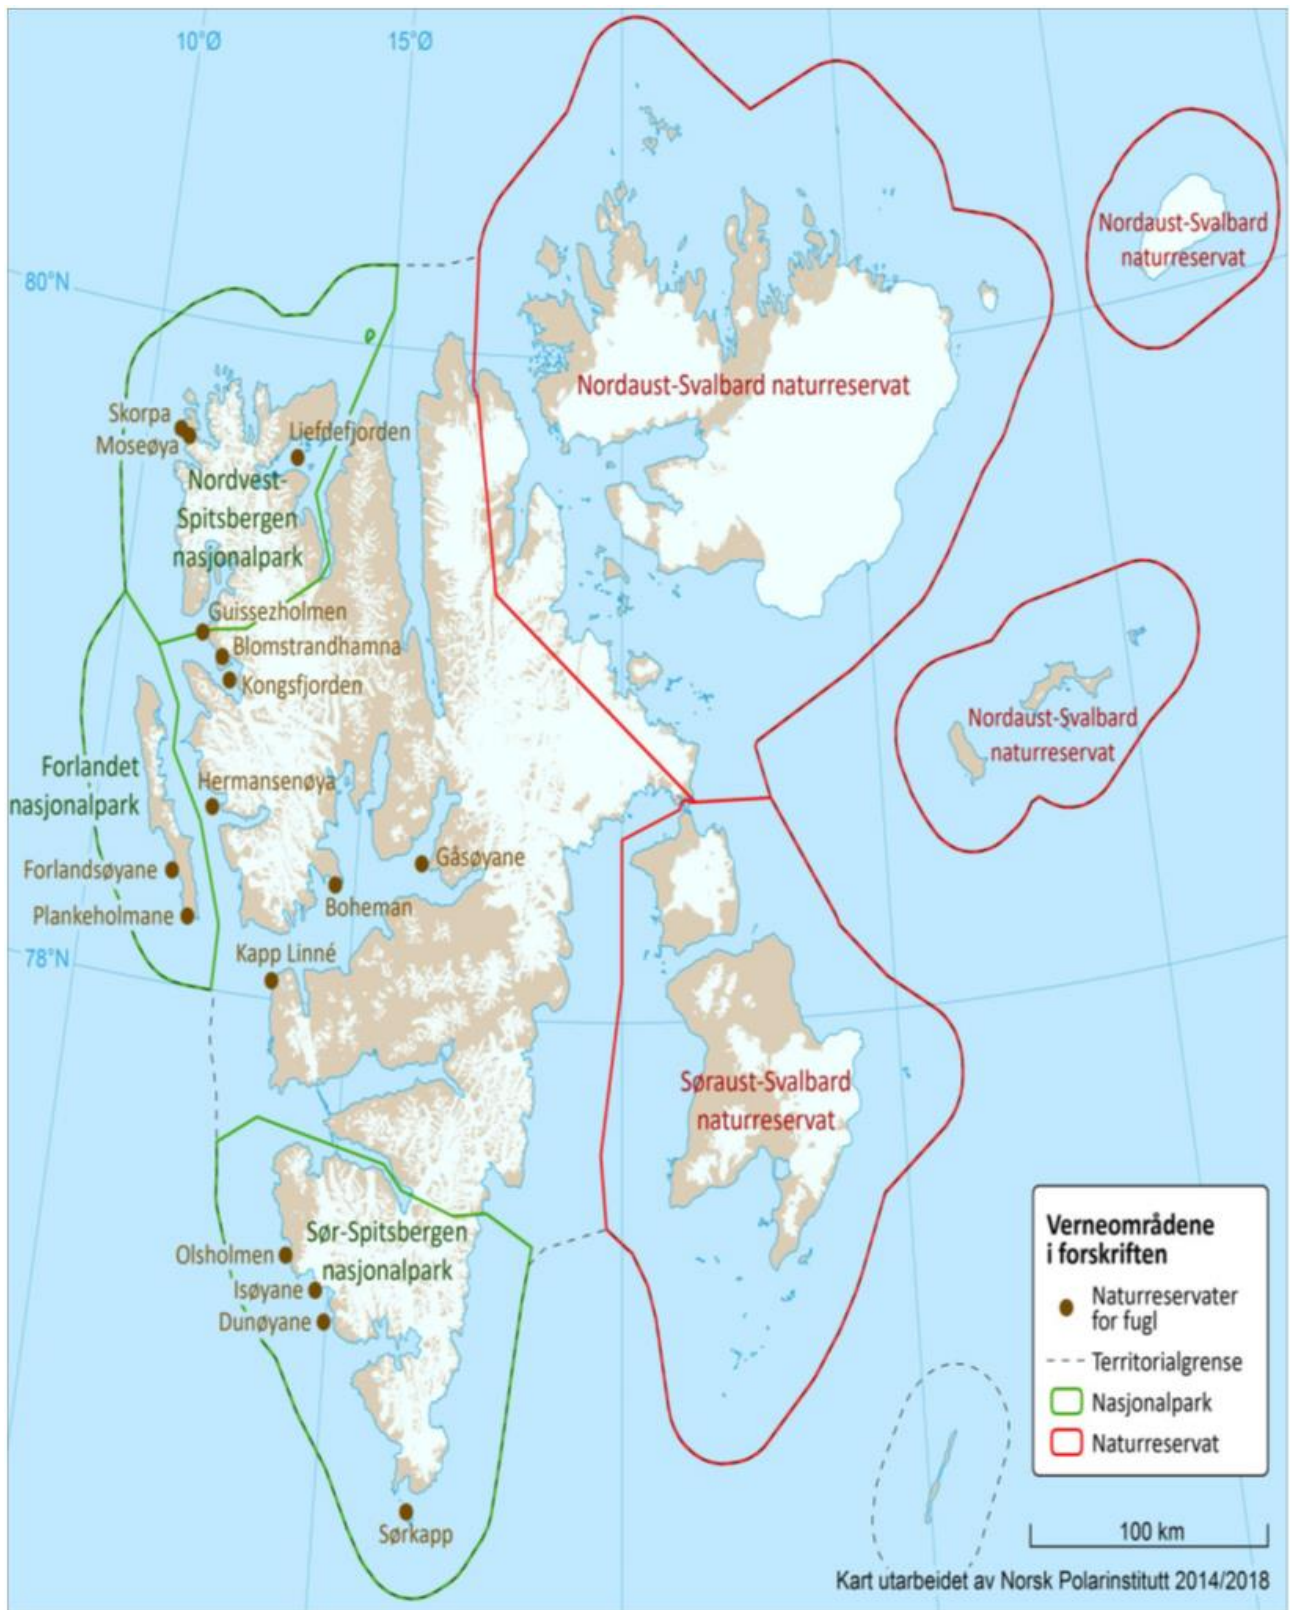

All traffic in the nature reserves for birds, including traffic at sea and landing by aviation aircraft, is prohibited in a time of 15 May 2015. May to 15. August. The governor can still provide regulations on the traffic in the Cape Linné Nature Reserve for Birds.

Traffic at sea by kayak and other vessels without engine, is nevertheless permitted after the nearest navigable route along the coastline within the boundaries of Kongsfjorden Nature Reserve for Birds, at Prins Heinrichøya and Mietholmen, and in Boheman Nature Reserve for Birds.
